LOGIC TRENDS Partners with BMC Software to Deliver BMC Identity Management for .NET

ATLANTA - (January 30, 2006) - Logic Trends, Inc. a leading provider of Security, Identity and Access Management solutions, today announced support for BMC Identity Management for .NET. Through a reseller agreement, Logic Trends will work with BMC to provide customers end-to-end identity and access management solutions and consultancy services based on the industry leading solution, BMC Identity Management for .NET.

BMC Identity Management for .NET harnesses the power of the Microsoft infrastructure enabling Logic Trends to provide even greater identity and access management value to customers. Logic Trends provides customers with the knowledge and expertise of the .NET platform to help ensure successful, timely, and on-budget deployments. Logic Trends and BMC have partnered on numerous deployments of the BMC Identity Management for .NET, proving the enterprise capabilities and customer successes available with the solution offering.

"The partnership enables us to bring a complete .NET-based Identity and Access Management solution to our customers, including: web access control, single sign-on, provisioning, de-provisioning, web-based administration and audit," said Andrew Ames, Director of Sales & Marketing for Logic Trends. "The fact that BMC Identity Management for .NET leverages customer's native Microsoft infrastructure and IT skills sets, is a significant value add, enabling Logic Trends and our customers to quickly deploy, integrate and realize the value of enterprise identity and access management."

"BMC is committed to helping customers improve their security and identity management practices as easily and quickly as possible, which in turn, can help them improve business operations and services," said Bob Worner, Director Solution Line Management, Identity Management Business Unit, BMC. "BMC Identity Management for .NET brings customers a complete identity management solution that taps into existing investments in the Microsoft infrastructure. By partnering with Logic Trends we are able to provide strong technology, valuable expertise, and proven processes to our customers."
