

## **Logic Trends extends Identity & Access Management solution offering with Courion Partnership**

ATLANTA, GEORGIA – April 13, 2006 – Logic Trends, Inc. a leading services, consulting and systems integration firm focused on Security, Identity and Access Management has partnered with Courion to further their solution base. With this partnership, Logic Trends secures one of the leading, stand-alone Identity and Access Management solutions on the market, and further solidifies their leadership and knowledge in the space.

Leveraging Logic Trends proven IAM5 methodology, and Courion's out-of-the- box password and provisioning functionality, we see considerable benefits from the ability to quickly address customer pain points with more balanced product portfolios which enable them to address unmet provisioning needs among the mid-market.

Logic Trends developed an access management and reporting accelerator to assist organizations with the people, process and technology components of Regulatory Compliance, specifically Sarbanes-Oxley. The accelerator solution is optimal for organizations with an eye towards Microsoft's infrastructure optimization. Additionally, the accelerator is easy for organizations to adopt and implement, enabling them to deliver rapid business impact.

"With their proven success, commitment to product quality, training, and support Courion is an ideal technology partner. With technical solutions that minimize the complexities of IAM projects, Courion enables us to rapidly demonstrate tangible results to customers," said Andrew Ames, Vice President of Sales and Marketing, Logic Trends. "Courion has provided us with the opportunity to expand our existing solution portfolio and meet new demands for identity and access management initiatives."
