

## **Logic Trends and Quest Software help companies address Identity Management and Regulatory Compliance needs.**

ATLANTA, GEORGIA – May 15, 2006 – Logic Trends, Inc. a leading services, consulting and systems integration firm focused on Security, Identity and Access Management has partnered with Quest to help companies better leverage their Microsoft infrastructure to address Identity Management and Regulatory Compliance needs. With this partnership, Logic Trends continues to extend its expertise in the Identity & Access Management space, and assist customers with the technology and process challenges of compliance... while leveraging industry standard Quest software tools.

Leveraging the proven IAM5 methodology and the proven capabilities of Active Roles Server, Logic Trends and Quest have successfully engaged and met the needs of a large financial services organization. Expertise within Microsoft space is a natural fit for both organizations, as they're able to leverage Quest technology and Logic Trends people and processes to assist organizations with the adoption of enterprise IAM solutions and further mature the infrastructure to address regulatory compliance initiatives.

"In addition to the challenges and opportunities Identity Management presents for Information Security Officers and IT Management, organizations are increasingly looking to enhance and extend the capabilities of their proven Microsoft infrastructure" commented Andrew Ames, Vice President of Sales & Marketing for Logic Trends. "Quest's solutions for User Lifecycle Management and Reporting allow customers to leverage existing Microsoft infrastructure investments, specifically Active Directory, and standardize identity management across the enterprise."
