

Logic Trends furthers Identity & Access Management offering with K2.net™ and Microsoft

Atlanta, Georgia – November 20, 2006 – Logic Trends, Inc. a leading services, consulting and systems integration firm focused on Security, Identity and Access Management has partnered with K2 and Microsoft to further their solution base. With this partnership, Logic Trends is targeting organizations looking to further develop their Microsoft infrastructure to assist with regulatory compliance and operational efficiency.

Leveraging the proven IAM5 methodology, Logic Trends developed an access management and reporting accelerator to assist organizations with the people, process and technology components of Regulatory Compliance, specifically Sarbanes-Oxley. The accelerator solution is optimal for organizations with an eye towards Microsoft's infrastructure optimization. Additionally, the accelerator is easy for organizations to adopt and implement, enabling them to deliver rapid business impact.

"With its commitment to product quality, training, support and Microsoft integration, K2 is an ideal technology partner. With solutions that minimize the complexities of workflow and service request, K2 enables us to rapidly demonstrate tangible results to customers," said Andrew Ames, Vice President of Sales and Marketing, Logic Trends. "K2 has provided us with the opportunity to expand our existing solution portfolio and meet new demands for identity and access management initiatives."
