

LOGIC TRENDS INC., CONTINUES TO SUPPORT GROWING IDENTITY AND ACCESS MANAGEMENT PRACTICE

ATLANTA, GA - (MAY 24, 2007) - Logic Trends, Inc. a leading provider of Security, Identity and Access Management solutions, is pleased to announce the addition on several, senior team members: Patrick Angel, Mark Stephens and Larry Viars. These additions bring Logic Trends over 30 years of architecting, designing and deploying Identity Management solutions. Additionally, they add significant industry specific IAM product and project experience to the Logic Trends team, including Microsoft, Sun, and Oracle.

“Patrick, Mark & Larry are extremely valuable additions to our growing team, bringing considerable IdM knowledge, a true customer perspective and extensive, enterprise project deployment expertise,” stated Andrew Ames, VP of Sales & Marketing. Ken Stone, Managing Partner said, “Their experience, insight and IAM project expertise will continue to support and enable our growth, as we shoot for another record year of growth.”

Logic Trends has developed a complete Identity & Access Management offering (IAM5)... complete in the sense of processes, level of effort, people, services, and of course, technology. The past few years in the IAM product space has certainly been a learning experience as I've found many customers 'wanting' to get to the end state of Identity & Access Management (i.e. provisioning, identity unification, access control, SSO, self-service, workflow), but several not knowing where to start... or better yet, not knowing what a project may look like, how long it will take or how much it will cost. Patrick, Mark and Larry have quickly embraced this offering and are already helping Logic Trends customers navigate the waters of IAM.
